

A 6 Point Garbage Manifesto for Ontario

The next Ontario government must:

1. Seriously commit to achieving the 60 percent diversion target in 5 years.
2. Strictly enforce recycling regulations for business, commercial and construction waste.
3. Immediately impose a moratorium on landfill expansions until an Ontario-wide waste management plan is developed.
4. Allow municipalities to regain control of non-residential waste.
5. Level the economic playing field by promoting the use of environmentally-preferred waste management technologies and practices.
6. Aggressively pursue and lead in the adoption of modern, low-emission waste to energy solutions.
